## PUBLIC NOTICE RECEIPT OF AN OPERATING LICENSE RENEWAL APPLICATION FOR A HAZARDOUS WASTE FACILITY

On July 7, 1982, the Department of Natural Resources issued a hazardous waste facility operating license to Environmental Waste Control, Inc., located at 27140 Princeton Avenue in Inkster, Michigan, pursuant to the Michigan Hazardous Waste Management Act, 1979 PA 64, as amended. That license has expired and the company has filed a timely license renewal application.

Environmental Waste Control, Inc. carries out the following waste management activities: reclamation of useable oil and fuel from contaminated oils and solvents, neutralization of waste pickle acids and corrosive wastes generated from steel finishing operations, destruction of precipitation of metals and temporary storage in containers and tanks prior to treatment.

Department staff are currently reviewing the reapplication to determine if it is complete and technically satisfies all Act 64 licensing requirements. Based on this review, the Department will propose to reissue or deny the operating license. A public hearing will be held on this tentative determination prior to making a final decision. A notice will appear in this publication approximately 30 days prior to the date of the hearing. At this time the Department is soliciting public comments on the adequacy of the application and any issues associated with the facility's past operation. Comments should be sent to the address given below by June 15, 1987.

The company's application may be reviewed at the following locations: the Michigan Department of Natural Resources, Hazardous Waste Division Office, First Floor, South Ottawa Building, Lansing, Michigan; the DNR Southeast Michigan Field Office, 505 West Main Street, Northville, Michigan; and the Inkster City Hall, City Clerk's Office, 2121 Inkster Road, Inkster, Michigan.

To receive future departmental notifications regarding this facility, please write to Linda Reyes at the address below and request to be put on the mailing list for the Environmental Waste Control, Inc. operating license reapplication. Be sure to include your correct mailing address. Questions regarding the facility should be addressed to Cheryl Howe, the Hazardous Waste Division permit engineer responsible for the review of this application, at 617-373-2730.
